INTRODUCTION

LCX 111275 is an additive masterbatch for use in CO2 laser applications in polyolefins and TPE. This masterbatch is relatively colorless when used at the recommended letdown and provides a distinct intense dark mark on a clear or light colored background color.

BENEFITS

- LCX 111275 is provided in masterbatch form to facilitate handling and processing
- Proprietary additive and carrier system for improved marking
- Can be used for colored and non-colored/natural compounds
- Safe and suitable for packaging

RECOMMENDED USAGE

Typical use levels range from 1% to 2% depending on application, part thickness, and desired performance.

STORAGE AND HANDLING

LCX 111275 should be stored in closed containers in a cool, dry environment.
