INTRODUCTION

LCX 117651 is a laser marking masterbatch for PE/PP extrusion or injection molded grades. This masterbatch is virtually clear when used at the recommended letdown and provides a distinct dark mark on a clear or light colored background color.

BENEFITS

- Pellet form to facilitate handling and processing
- Proprietary additive and carrier system for improved marking
- Can be used in colored and uncolored/natural compounds
- Safe and suitable for packaging

RECOMMENDED USAGE

Typical use levels range from 1% to 2% depending on application, part thickness, and desired performance.

STORAGE AND HANDLING

LCX 117651 should be stored in closed containers in a cool, dry environment.

REGULATORY

FDA approved for food contact.

Data are obtained from specimens molded under carefully controlled conditions from representative samples of the product described herein. Properties may be materially affected by molding techniques applied and by the size and shape of the item molded. No assurance can be implied that all molded articles will have the same properties as those listed.

No information supplied by RTP Company constitutes a warranty regarding product performance or use. Any information regarding performance or use is only offered as suggestion for investigation for use, based upon RTP Company or other customer experience. RTP Company makes no warranties, expressed or implied, concerning the suitability or fitness of any of its products for any particular purpose. It is the responsibility of the customer to determine that the product is safe, lawful and technically suitable for the intended use. The disclosure of information herein is not a license to operate under, or a recommendation to infringe any patents.
