

Product Description

FCX 128112 Foaming Agent Masterbatch Endothermic

INTRODUCTION

Foaming agents, or chemical foaming agents (CFAs), are sometimes referred to as chemical blowing agents (CBAs) and are used to foam thermoplastic resins to impart a cellular structure to the material. Chemical foaming agents decompose to release gas when heated to their activation temperature. FCX 128112 is an endothermic CFA to be used in injection molding processes for weight reduction and sink mark elimination.

BENEFITS

- FCX 128112 is provided in masterbatch form to facilitate handling and processing
- Endothermic release of carbon dioxide gas which reduces cycle time and improves processing
- Weight Reduction
- Sink mark and warpage elimination
- Imparts a uniform cell structure which promotes improved surfaces and property retention
- Rapid degassing
- No discoloration

RECOMMENDED USAGE

Typical use levels range from 0.1 to 1.5% depending on application, process, part thickness, and desired effects.

STORAGE AND HANDLING

FCX 128112 should be stored in closed containers in a cool and dry environment.

24 JAN 2012

This information is intended to be used only as a guideline for designers and processors of modified thermoplastics for injection molding. Because injection mold design and processing is complex, a set solution will not solve all problems. Observation on a "trial and error" basis may be required to achieve desired results.

Data are obtained from specimens molded under carefully controlled conditions from representative samples of the compound described herein. Properties may be materially affected by molding techniques applied and by the size and shape of the item molded. No assurance can be implied that all molded articles will have the same properties as those listed.

No information supplied by RTP Company constitutes a warranty regarding product performance or use. Any information regarding performance or use is only offered as suggestion for investigation for use, based upon RTP Company or other customer experience. RTP Company makes no warranties, expressed or implied, concerning the suitability or fitness of any of its products for any particular purpose. It is the responsibility of the customer to determine that the product is safe, lawful and technically suitable for the intended use. The disclosure of information herein is not a license to operate under, or a recommendation to infringe any patents.
